**RABIES** **3** YEAR **Injectable**

This product has been shown to be effective for the vaccination of healthy dogs, cats, ferrets, cattle and sheep 12 weeks of age or older against rabies. Duration of immunity of at least 1 year has been demonstrated in ferrets, cattle and sheep and at least 3 years in dogs and cats after repeat dose. For more information regarding efficacy and safety data, go to [productdata.aphis.usda.gov](http://productdata.aphis.usda.gov).

**Directions:** Shake well. Administer a single dose. A repeat dose should be administered 1 year later. Dogs, Cats and Ferrets: Aseptically administer 1 mL subcutaneously. Dogs may be vaccinated intramuscularly or subcutaneously. Cattle and Sheep: Aseptically administer 2 mL intramuscularly.

**Precautions:** Store at 2°–8°C. Do not freeze. Use entire contents when first opened. Sterilized syringes and needles should be used to administer this vaccine. Do not vaccinate within 21 days before slaughter. Contains gentamicin and thimerosal as preservatives. This product has not been tested in pregnant animals. As with many vaccines, anaphylaxis may occur after use. Initial antidote of epinephrine is recommended and should be followed with appropriate supportive therapy. Do not mix with other products. In case of human exposure, contact a physician.

Technical inquiries should be directed to Zoetis Inc. Veterinary Services, (888) 963-8471.
